RECOGNITION
PARKING IS DIGITAL.

TICKETLESS PARKING

/ The camera makes the difference

Making parking a pleasure: Ticketless and comfortable. Make use of cameras with or without barriers and thereby benefit from Deep Learning and AI! With entervo ticketless parking, Scheidt & Bachmann offers variable options for modern parking management.

- Hybrid - combines parking ticket and license plate
- Ticketless - camera-based with barrier
- Free-Flow - camera-based without barrier

The smart solution to achieve maximum comfort: The car's license plate is scanned by cameras and becomes a virtual parking ticket. The customer pays with cash, bank or credit card or conveniently in the entervo smart pay app - directly on the smartphone. **Digital, flexible and sustainable!**

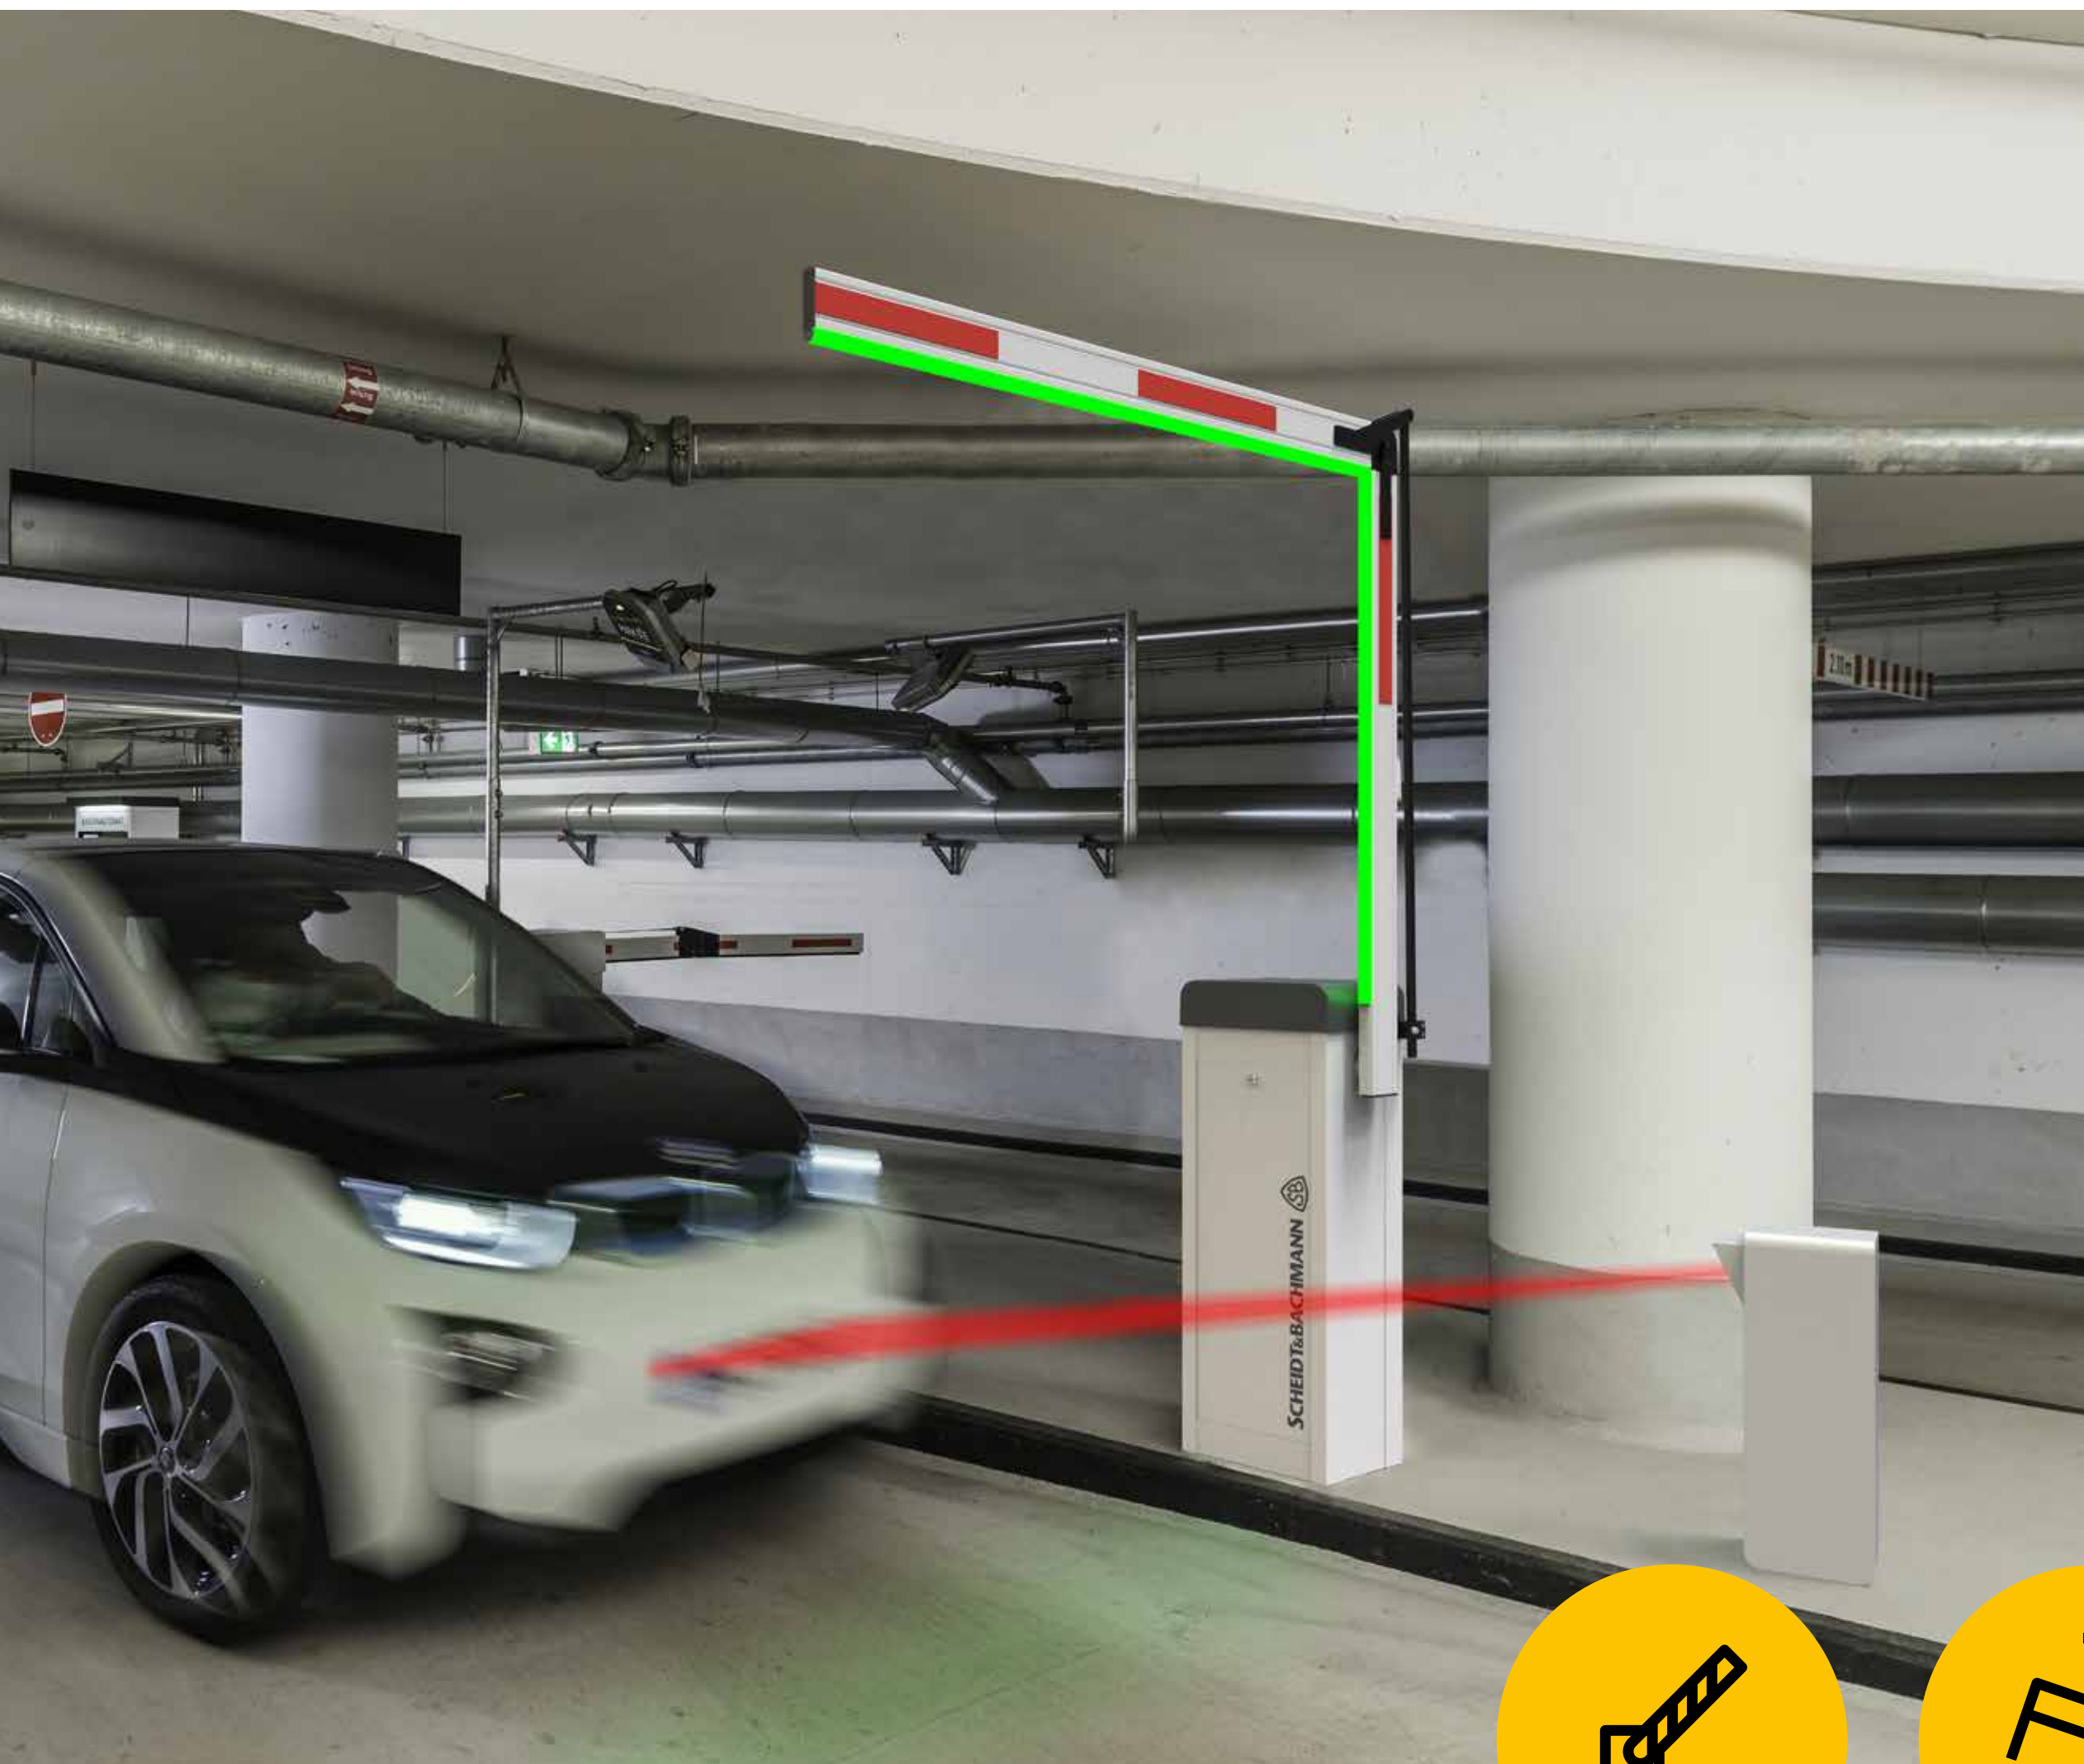

/ Hybrid

COMBINES CAMERA, TICKET AND BARRIER

Three in one: The modern solution for the classic car park combines parking ticket, camera and barrier. The camera scans the license plate at the entrance and this is transferred to the system together with the ticket data. The customer receives a parking ticket as usual and chooses between different payment options (cash, credit card, entervo smart pay app). At the exit, the license plate is recognised and the barrier opens automatically.

Ticketless exit - fast and convenient!

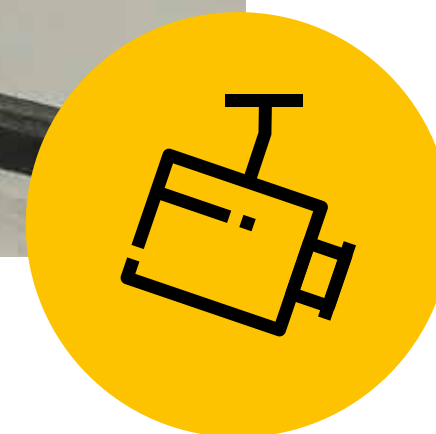

/ Ticketless

SMARTER PARKING! TICKETLESS AND CONVENIENT

Greater convenience for car park operators/owners and parkers and good for the environment! The smart solution for digital parking by Scheidt & Bachmann offering maximum efficiency: Entry and exit are camera-based. Control devices and paper tickets are superfluous. The car's license plate serves as the basis for payment at the automatic pay station or in the entervo smart pay app. The barrier opens automatically.

Ticketless parking - contact-free and sustainable!

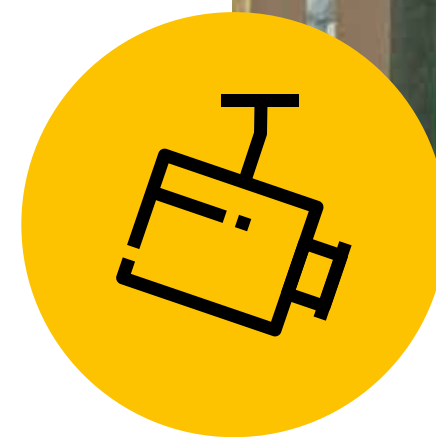

/ Free-Flow

NO BARRIERS THE FASTEST WAY TO PARK!

The positive parking experience: Use a display to communicate with customers and give parkers more space in the entry and exit lanes. Do away with barriers, ticket machines and paper tickets. Free-Flow - the solution for achieving maximum comfort in the parking area. After the license plate has been recognised, the data is processed in the parking management system. At the end of the parking period, the customer enters the licence plate number at the pay station or in the entervo smart pay app and leaves the car park in free-flow mode. Open transactions are stored in the Enforcement Export Manager and can be tracked via an interface to a collection agency.

Free-Flow Parking - stress-free, contactless and sustainable!

/ entervo.sign customer display

COMMUNICATE DYNAMICALLY WITH PARKERS

Communicate directly with your customers! entervo.sign offers an appealing display option with a flexible information design. This includes guiding customers through the parking process, displaying information about the car park and using it as an advertising platform. A real eye-catcher and a modern business card for your car park. Your customers feel welcome and well informed thanks to clear, digital customer communication.

Appealingly designed information!

MOBILE AND SECURE: PAY AND VALIDATE USING ENTERVO

ENTERVO SMART PAY APP & WEB PAY

Our digital solutions for handling payment securely: Mobile and customer-friendly. With the entervo smart pay app, customers pay using their smartphone. Simply download the app, scan the ticket or enter the car's license plate number. Pay by credit card or PayPal. Or pay conveniently afterwards with the Web Pay solution when Free-Flow parking. **Cashless and contactless!**

ENTERVO.PAY & ENTERVO.PAY CASHLESS

As an all-in-one solution, the entervo.pay automatic pay station offers payment options using both cash and cashless options. With full functionality, the slim-design entervo.pay cashless system focuses on cashless payment. Be it ticket, QR code or car license plate - both types of automatic pay stations show their flexibility here. Customise the system to meet your needs, e.g. with easily configurable event tariffs. **The choice is yours!**

ENTERVO SMART VALIDATION

Scheidt & Bachmann's digital validation solution is cloud-based and suitable for use on our ticketed or ticketless parking systems – it's easy to use. Partnering local businesses and empowering them to provide concessionary parking to their customers is a win/win. Retailers, gyms, cinemas, restaurants etc. can entice their customers, make a sale and discount their customers parking. You, the car park owner/operator reconcile the validations and cross-charge the businesses via the intuitive dashboard.

- Car Park Owner/Operator wins
- Local Business wins
- Motorist wins

Functional, transparent and clear reporting is naturally included. **Digital, simple, transparent!**
